Dear Ms. Ali,

I am still waiting for your reply regarding contact with the editor of manuscript 5153401.

As you know, journal ethics require direct contact between editor and author. It appears that Advances in Meteorology is presently in violation of the ethical standard of journalistic practice, outlined by the Committee on Publication Ethics.

You can please relieve this violation by adhering to the standard practice of contact with my manuscript editor.

Absent contact with the editor, I have no direct way of knowing that the manuscript has indeed gone out for review. Persistence of Adv. Meteorol. in this ethical violation would remove confidence in adherence of the Journal to process integrity.

After 3 months, I would also like an estimate of duration of review. I do not wish to remain in an indefinitely prolonged process.

Please reply substantively to this query at your earliest convenience; certainly by the evening of Monday, 14 November.

Thank-you very much for your consideration,

Pat
