Dear Prof. Hong,

Thank-you for your email. You have communicated your strategy perfectly.

Please accept my apologies for having disturbed your serenity. I mistakenly assumed you people are scientists.

Yours sincerely,

Pat Frank

Dear Pat Frank,

First, we really appreciate your submission on APJAS.

However, as mentioned in previous communication, it is our strategy to have the handling editor all the right of the decision of the assigned paper. Also, the APJAS has a strategy to assign the previous submission to the same editor.

We hope you to understand our strategy.

Dear Prof. Hong,

Prof. Lee's reasons for declining manuscript APAS-D-14-00036 have no objective relevance. She is evidently unable or unwilling to evaluate a paper assessing the uncertainty arising from climate model error.

Accordingly, I respectfully request that you assign manuscript APAS-D-14-00036 to an alternate editor.

Thank-you very much for your consideration,

Pat Frank
